PROFILE

Computer Programming & Analysis student seeking a Software Developer Intern role. Currently building Soynikon Desk, a full-stack web application for a real business, handling everything from database design to frontend implementation. Bringing strong problem-solving skills, attention to detail, and a quick learning ability developed through hands-on academic and real-world projects. Eager to contribute to a development team and grow as a software developer.

LANGUAGES

- HTML, CSS, JavaScript
- PHP, MySQL, Python
- Java, Git / GitHub

FRAMEWORKS & TOOLS

- React, React Router, Vite
- Bootstrap, WordPress
- VS Code

OTHER

- REST APIs & JSON
- CRUD Operations
- Responsive Design

PROJECTS

Soynikon Desk | Full-Stack Web Application

- Developed a full-stack management system for Soynikon Photo Store by rebuilding the old code base from PHP & vanilla JavaScript into modern React (Vite).
- Created a PHP API with JSON endpoints, CORS, and prepared statements.
- Created CRUD for client management with live state changes, filters, and edit system.
- Designed an SQL database using multiple tables and showing relational data in simple formats.
- Used React Router for client-side navigation, Sonner for toast notifications, and environment variables for API configuration.
- User authentication system with protected React routes, JWT, and role access control.

EXPERIENCE

Quality Analyst & Customer Service | Data Vimenca (For Fiserv)

September 2023 – December 2024

- Handled high-volume customer support using CRM tools
- Monitored and analyzed call quality to ensure service standards
- Collaborated with teams to identify and resolve recurring issues

Computer Science Intern | Universidad Autónoma De Santo Domingo

October 2022 – April 2023

- Assisted with WordPress site management and content updates
- Worked on team-based development projects
